Cattle Market Steady, With Moderate Receipts.

The Wichita hog market yesterday was & cents lower in sympathy with all other biarkets. Provisions were dull, but car of light hogs on the early market.

The daily comparisons are as follows:

tents through the day. The local market

Yesterday, tops, \$2.55; bulk, \$2.45\$2.55; avtents through the day. The local market was well sustained from the opening to the close. The receipts were fairly liberal, being considerably more than the flay previous, and only a little under the flay previous, and only a little under the flay are day last week. Though the offer-lame day last week. Tho tents through the day. The local market ings were good, and in fact along the line the avorage for some time, the demand was equally firm and up to the supply and all sale hogs were readily absorbed and the hog pens empty at the close. The quality on the whole was very good, not alone in weight, but in the inherent worth of the stuff offered. The bulk of the hogs phowed good feeding and were in the main well rounded, fat, trim hogs, just such as is most wanted by the local killing interest. All these hogs brought good prices, and sold promptly and well. The ops were the same as on the day before, and the real good stock in sustained this top price, some loads of which the day before would have brought at least five cents higher. The local trade and the wagen supply was fairly good, though not extra, and these hoss, while coming in scatteringly, were often in good size! sunches, and sold at once. For a long time the sales went at prices ranging from \$3.30 to \$1.45, the first car load to cross the scales going at \$3.50. The top price of \$1.55 was made toward the close and Was a lot of 224 pound hoga, which sold without dock to Dold. Four out of the seven cars on sale took the \$3.50% price, and were fair to good hogs, running in weight from the light weight of 255 pounds to the heavy point of 257 pounds. The two other cars went at \$1.50, and Were respectively 156 and 251 pounds. Everything considered, the grade of hogs on sale was very fair, there being few coarse packers or extra lights received, even though the receipts were quite liberal. The day was closed comparatively early, with all offerings disposed of, and every one satisfied. More equally good hogs would have met with as good a reception and sold, as the various buying in-terests were eager for hogs, in the various classes. Today is expected to be light, as the Exchange has voted to take it easy today, on account of the day being Wichita day at the State fair. However, all hogs will be cared for and as promptly disposed of as any day.

Even at this point, and nothing in this line ever goes beging, and more can be used every day than comes in. These columns have before cautiened the southness shippers against being guiled by scalars out and around the country who impose upon the farmers and breeders, and after virtually smalling their cattle at a sacrifice, enter the market in position to comprete with legitimate and results to the position the basis is low enough for the start of a buying campaign. Of course, there is a difference on this point. For instance, the Cuidahys seem to have a point of the country.

Trials of Today

Looking facts in the face is the way the wise man acts. Those who look another way to the trials of today add to sufferings of tomorrow. If your eyes are weak; or burn, to delay is to aggravate the trou-

Glasses and Glasses

Some people seem to think that if they only wear glasses it will be all right with their eyes. There would be just as much sense in prescribing the same medicine for every disease. We give an examina tion that can leave no defect uncorrect-

The Difference

Between living well and living poorly is very small if you buy right. The difference between seeing well and seeing poor-ly is beyond endurance. We want to meet ople who are troubled with poor eyesight. See that your first pair of glasses is correctly fitted. The importance of beginning right is very great. We make a

What We Inherit

We are not to blame for. We cannot be held responsible for the dispositions and tendencies which we derive from our ancestors, nor are we responsible for the themselves in our blood as a heritage from former generations. But we are responsible when we allow congenital or heredftery eye trouble to go uncorrected in our children when properly adjusted glasses will relieve all trouble.

Cleaning Glasses

Is an accompaniment of their west. But don't mistake defective or non-suitable lenses for moisture or dust on them. If your glasses are not the exact kind you should wear, they will do you more barm than good. Perhaps you would do well to call on us and find out whether you have the RIGHT lenses. We'll be bonest with you-we can't afford to be otherwise.
